

TONCO DISCLAIMER

Last updated: October 30, 2025

TONCO DEX is a non-custodial decentralized exchange and liquidity platform built on the TON blockchain. It operates through smart contracts that enable token swaps, liquidity provision, and related decentralized finance (DeFi) activities under open-source, permissionless conditions.

TONCO DEX is not a financial institution, payment service provider, investment advisor, broker, or exchange operator in any jurisdiction. The terms “swap,” “trade,” “deposit,” “earn,” and other similar wording used on the TONCO website or related applications are for descriptive and user-friendly purposes only. They do not imply regulated financial activity or any form of licensed operation.

Any digital asset that can be used, connected, or interact with TONCO smart contracts is a utility token and is not structured or intended to represent a security, derivative, financial instrument, e-money, or payment token in any jurisdiction. TONCO DEX and its developers do not actively market services to any specific country, audience, or user group.

Access to certain TONCO DEX functions may be restricted or unavailable in some countries, territories, or jurisdictions. Users are responsible for ensuring that their use of TONCO complies with applicable laws and regulations in their location.

While TONCO DEX aims to provide a secure and transparent environment for decentralized trading, it is offered strictly “as is,” without warranties of any kind, whether express or implied, including but not limited to fitness for a particular purpose, merchantability, or non-infringement.

By interacting with TONCO smart contracts, users acknowledge and accept the inherent risks of blockchain systems, including potential smart contract vulnerabilities, price volatility, and loss of assets. TONCO, its contributors, and affiliated entities disclaim all liability for any damages, losses, or claims arising from or related to the use of its software or smart contracts.
